

## **ISEC 5430: Enterprise Cybersecurity**

### **Spring I 2024**

**Nick Simmons, CISSP|CISM|CRISC**  
**nicholas\_simmons@baylor.edu | 407-222-6478**

**Purpose:** Welcome to the Policy & Planning course! By the end of the term, I expect each of you will have a much better understanding of both cybersecurity in general, and in the formation of cybersecurity policies in specific. Cybersecurity is a diverse and fascinating area of study. Beyond that, it is an area that affects each of us every single day in myriad ways. As we continue to put our personal information “into the world,” we need to ensure both we and the organizations we interact with are protecting information as stringently as possible.

Technology is rapidly changing, and cyber criminals continuously find new ways to exploit. The pandemic accelerated the need to address cybersecurity as a business problem. This course will help you understand the critical policies, why they matter, and how to apply them in an organization. It all starts with a plan and every organization must define their cybersecurity position, while communicating and measuring effectively.

I will be using both readings and video lectures to provide the information you need to be successful. I recorded the lectures to summarize the readings, focusing on cybersecurity fundamentals. You will be required to complete three types of assessments to demonstrate your understanding of the material. These assessments include quizzes to assess your specific understanding from the readings; online discussion questions to ensure you can exchange information on the cybersecurity issues we are discussing; and actual cybersecurity policy documents you will be authoring that I hope you can practically use in your career. The cybersecurity policy documents (weekly assignments) are the most heavily weighted portion and are based on a fictitious company “ZetaAlpha.” It’s ok to research and use your own examples and/or use the examples I’ve provided (i.e., links and optional book referenced below) as a framework.

**Prerequisites:** Admission to the program has satisfied requirements for this course.

### **Required Materials & Technology:**

1. Writing Information Security Policies, Scott Barman, 2001, 1st edition, New Riders Publishing; ISBN: 978-1578702640
2. Fundamentals of Information Systems Security, 3rd edition, David Kim; Michael G. Solomon, PhD; ISBN-13: 978-1284116458 ISBN-10: 9781284116458

The Fundamentals of Information Security Systems released a 4th edition that can also be used. If you have already completed ISEC 5405, you should have this textbook. You can acquire these texts through any online outlet you normally use to buy texts or other books.

ONE NOTE: There is no requirement to purchase the virtual lab access for the second textbook.

### Supplemental or Optional Materials:

#### Optional Book:

Information Security Policies, Procedures, and Standards: A Practitioner's Reference; Douglas J. Landoll, ISBN-13: 978-0367669966, ISBN-10: 036766996X

#### Course Communications:

- Students are responsible for setting their Canvas notifications so that they receive an alert for important course communication and due dates. Visit this guide to learn how.
- Office Hours - There will be 1 session (1 hr.) in weeks one, three and five using the Conferences tool in Canvas. I'm flexible about questions and emails and will make myself available should you need specific guidance or have any questions.
- Preferred Method of Contact - Please feel free to reach out via phone, text, or email and I will answer as quickly as possible. I look forward to hearing from you!
- Feedback/Response Policy – I will do my best to respond within 24 hours.

**Learning Goal:** My main goal for this course is that you learn enough information about cybersecurity policies to raise your awareness and apply directly to your career/work situations. This course will enable you to differentiate in your current role and in the marketplace.

**Course Objectives:** How does each of the modules in the course help you achieve the learning goal? Give a brief overview of this here.

These objectives are provided below to facilitate the student's understand of expectations and direction of the course.

|                                                                         | Specific Objectives                                                                                                                                                                                                                                                                                                                                   |
|-------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Module 1: Information Security Program and Privacy</b>               | By the end of this module, you should be able to identify the security program, analyze the elements contributing to the organization's IS program, and integrate these elements into a coherent policy statement. These goals also apply to the understanding of an organizational privacy policy.                                                   |
| <b>Module 2: Risk Management and Incident Response</b>                  | By the end of this module, you should be able to identify the elements of an organizational information security risk management policy; elucidate your position vis- à-vis the organizational risk management and incident response policies; and coalesce the concepts of risk management and incident response into two cohesive policy documents. |
| <b>Module 3: Acceptable Use, Non-Compliance, and E- Mail /Messaging</b> | By the end of this module, you should be able to: <ul style="list-style-type: none"><li>• recognize the elements an acceptable use policy (AUP) and the specifics of compliance, and email/messaging responsibilities; analyze the pros and cons of AUP</li></ul>                                                                                     |

|                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                      | <ul style="list-style-type: none"> <li>• specifics dictated by organizational issues and culture; and then synthesize elements of the AUP into an overall policy, along with specific branch policies concerning</li> <li>• non-compliance and email/messaging capabilities.</li> </ul>                                                                                                                                                      |
| <b>Module 4:<br/>Mobile Devices/<br/>Internet of<br/>Things/Artificial<br/>Intelligence</b>          | By the end of the module, you should be able to: identify mobile device and "Internet of Things" issues and concerns; express informed opinions regarding the acceptance and use of these devices within an organization; and outline the appropriate policies concerning these emerging technological advances.                                                                                                                             |
| <b>Module 5:<br/>Access Control,<br/>Identification<br/>and<br/>Authentication,<br/>and Password</b> | By the end of the module, you should be able to: recognize and reproduce the elements of an access control policy, including correct identification and authentication procedures, and robust password construction standards; illustrate the application of access control within an organization's information systems and capabilities; and compose policies which encompass appropriate access control practices within an organization. |
| <b>Module 6:<br/>Security<br/>Awareness and<br/>Training</b>                                         | By the end of the module, you should be able to: recall the elements of a sound security awareness and training program; critically examine these elements; and arrange the components of a security awareness and training program into a cogent and relevant policy.                                                                                                                                                                       |
| <b>Module 7: Final<br/>Project</b>                                                                   | By the end of the course, you should be able to assemble the policy documentation into an organizational-level document capable of driving change.                                                                                                                                                                                                                                                                                           |

**Course Requirements:** Student work will be comprised of extensive readings, and quizzes over those readings; relevant guided discussions; and the creation of contextually relevant policy documents to reflect the concerns of the topic area.

- **Quizzes** (20 points per module): A reading quiz will be given for most modules. This will be done via a Canvas quiz assignment. The quiz will be a combination of multiple choice, fill in the blank, and true/false. The quiz will assess your understanding of the readings and the lectures from each module. The quiz is to be taken individually. They will be due NLT midnight on Friday CT.

- **Discussions** (50 points per module): This class will include use of the discussion boards in each module. At the beginning of the module, questions will be posed for your consideration. I expect you to check in at least twice during the module to provide A) your answer to the question(s) posed and B) feedback to at least two other responses to the central question(s). Your initial post will be due on Friday NLT midnight CT. All responses are due Monday NLT midnight of the module week. Late posts will not be accepted. Posts will be graded based the rubric outlined in Canvas (see description on discussions for more information). The focus of the rubric will be on the analytical content of your responses. Did you answer the question in the simplest terms? Or did you analyze the context of the question and

provide a reasoned, sound argument? In your responses to other students, did you respect their opinions/answers, and did you provide insightful feedback? Or did you just agree or disagree without supporting ideas?

- **Assignments** (100 points per module): Your primary assignment for each module is the authorship of a policy document reflecting that central subject area. The purpose of this assignment is two-fold. First, the assignment will assess your ability to combine the concepts learned in the module with the context of the organization the policies are being written to support. Second, the policy documents will hopefully give you a rough template to follow should you be called upon to write one for your organization. The side benefit of this comes when you are looking for new employment. Hopefully, the portfolio of documents you build will enhance your “marketability” within the community. A set number of policies will be assigned with each module. Due to their short length, you will be asked to do usually two or three per module. They will be due NLT midnight on Monday CT.
- **Final Project** (200 points) For your “capstone” project, you will be asked to organize the policies you’ve written into a policy handbook. This handbook will need to have a cover page, a table of contents, an Executive Summary, and the policies with any suggested changes included. This will be due NLT midnight on the last day of class (CT).

**Due Date Policy:** All stated deadlines for this course are according to Central Standard Time (Baylor University’s time zone in Waco, TX). If you are located in a different time zone or are otherwise traveling beyond CST, please plan accordingly. Deadlines will not be adjusted according to your time zone.

**Late Work / Make-up Test Policy:** I will only accept late work when the delay has been previously coordinated and approved. If you encounter an illness or an unseen emergency, please inform me as soon as possible. My goal is to help raise your “cyber” awareness and help you differentiate in your current role and marketplace. I’m here to help and understand life happens, so just be sure to communicate.

**Grading:** Grades will be calculated based on 1180 total points. You must obtain the appropriate number of points to attain the grade. Final point scores will be converted into course grades using the following scale:

| <b>Grade</b> | <b>Total Points</b>    |
|--------------|------------------------|
| A            | 1085-1180 points       |
| A-           | 1062-1084.9 points     |
| B+           | 1026-1061.9 points     |
| B            | 967-1025.9 points      |
| B-           | 944-966.9 points       |
| C+           | 896-943.9 points       |
| C            | 849-895.9 points       |
| C-           | 826-848.9 points       |
| D            | 708-825.9 points       |
| F            | 707.9 points and below |

**Expectations of Professional & Academic Conduct:** All students are expected to uphold the highest levels of professional conduct and to act with honesty and integrity at all times. This includes all interactions with faculty, staff, fellow students, and all others.

### **Academic Integrity**

Plagiarism or any form of cheating involves a breach of student-teacher trust. This means that any work submitted under your name is expected to be your own, neither composed by anyone else as a whole or in part, nor handed over to another person for complete or partial revision. Be sure to document all ideas that are not your own. In addition, you must not provide course materials to other students, whether individually or generally (such as online) that would enable them to gain an unfair academic advantage. Instances of plagiarism or any other act of academic dishonesty will be reported to the Honor Council and may result in failure of the course. Not understanding plagiarism is not an excuse. I expect you, as a Baylor student, to be intimately familiar with the Honor Code at: <http://www.baylor.edu/honorcode/>

- **Copyright Notice:** Unless otherwise noted, the materials used and generated in this course are copyrighted. This includes, but is not limited to syllabi, class outlines, presentation slides, videos, lecture notes, exams, exercises and simulations. Making unauthorized copies for personal use is a violation of copyright protection.

**Disclaimer:** This syllabus is subject to change. I will maintain a current version of the syllabus and the date it posted on the course site.

### **Students Needing Accommodations**

Any student who needs academic accommodations related to a documented disability should inform me immediately at the beginning of the semester. You are required to obtain appropriate documentation and information regarding your accommodations from the Office of Access and Learning Accommodation (OALA). Stop by the first floor of Sid Richardson, East Wing in the Paul L. Foster Success Center or call (254) 710-3605 or email [OALA@baylor.edu](mailto:OALA@baylor.edu). Learn more about this topic in the orientation course [here](#).

### **Military Connected Students**

Veterans, active-duty military personnel, and dependents are encouraged to connect with the [VETS](#) program, a space dedicated to supporting our military-connected students. Please communicate, in advance, if possible, any special circumstances (e.g., upcoming deployment, drill requirements, disability accommodations).

### **Student Orientation Course**

You have been enrolled in a [Student Orientation Course](#) titled ‘Bear’s Den’. You should have already completed the modules in it so if you have not, please log in to Canvas, locate this course and complete the modules as soon as possible.

**Drop Dates & Registrar:** All registration will take place directly through your advisor. Reach out to Kelly Gould ([Kelly\\_Gould@baylor.edu](mailto:Kelly_Gould@baylor.edu)). For important dates such as start of registration,

payment deadlines, and drop-withdraw deadlines, refer to the online MBA academic calendar available in the orientation [here](#).

**Student Appeals Process:** An appeal process is available for any student who believes a Baylor faculty member has treated him or her unfairly with respect to a course for which the student was registered may complain of such alleged unfair treatment involving students' academic work. This process is outline in the student orientation [here](#).

**Technology** Canvas is our Learning Management System. You must use a supported browser accessing the web from a reliable, high-speed connection to avoid encountering problems. Visit the [Technology module in the Bear's Den](#) for more detailed information.

**Help Desk:** If you have any other questions about what you can do or where you can find things in Canvas, please refer to their [student guide](#). If you need additional assistance with Canvas or a Baylor system (including access) visit [Getting Help in the student orientation](#).

**Technology Policy:** The Canvas learning environment and your Baylor email fall under the jurisdiction of [Baylor technology policies](#). It is your responsibility to familiarize yourself with the policies that apply to the online learning environment. If there is an incident or violation, these are the standards which will be followed.

### **Mental Health Resources at Baylor University**

#### **The Counseling Center**

Connect with us for an initial appointment, goal-directed individual therapy, group therapy, nutritional counseling, and case management services. You can schedule your 30-minute initial appointment online through our [health portal](#) or by calling (254) 710-2467.

#### **Telehealth by Academic Live Care (ALC)**

Baylor has partnered with Academic Live Care to provide free 24/7 telehealth mental health support, counseling, and even medical care, including psychiatry, nutritional counseling, and more. To get started visit <https://baylor.academiclivecare.com/> or call (833) 969-3998 for immediate support or to begin regular counseling appointments.

#### **Join a mental health peer community - Togetherall**

Students can access the online peer-to-peer mental health resource, Togetherall for anonymous support and resources. Get [connected now!](#)

#### **Suicide Hotline (24 hrs.)**

Call or text # 988 anytime for support.

### **Substance and Behavioral Addiction**

[The Beauchamp Addiction Recovery Center](#) (BARC) supports students in recovery from substance and behavioral addictions through an all-encompassing level of support approach that includes one-on-one mentorship, support groups, and social events open to all Baylor students. Located in the East Village Residential Community (bottom floor of Teal Residential College). Contact Information: (254) 710-7092; [BARC@baylor.edu](mailto:BARC@baylor.edu)

## **Spiritual Wellbeing**

[The Office of Spiritual Life](#) offers programs, persons, and resources to nurture theological depth, spiritual wholeness, and missional living.

Located on the corner of 5th and Speight Street in the BoBo Spiritual Life Center.

Contact Information: (254) 710-3517; [Spiritual\\_Life@baylor.edu](mailto:Spiritual_Life@baylor.edu)

## **Baylor University Equity, Civil Rights, and Title IX**

### *Civil Rights Policy and Sexual and Interpersonal Misconduct Policy*

Baylor University does not tolerate unlawful harassment or discrimination on the basis of sex, gender, race, color, disability, national origin, ancestry, age (over 40), citizenship, genetic information or the refusal to submit to a genetic test, past, current, or prospective service in the uniformed services, or any other characteristic protected under applicable federal, Texas, or local law (collectively referred to as Protected Characteristics).

If you or someone you know would like help related to an experience involving:

1. Sexual or gender-based harassment, sexual assault, sexual exploitation, stalking, intimate partner violence, or retaliation for reporting one of these types of prohibited conduct, please visit <https://titleix.web.baylor.edu> or contact us at (254) 710-8454, or [TitleIX\\_Coordinator@baylor.edu](mailto:TitleIX_Coordinator@baylor.edu).
2. Harassment (excluding those issues listed in #1) or adverse action based on Protected Characteristics, please visit [www.baylor.edu/civilrights](http://www.baylor.edu/civilrights), or contact us at (254) 710-7100 or [Civil\\_Rights@baylor.edu](mailto:Civil_Rights@baylor.edu).
